

AGRIVA HOLLAND B.V.

NOORDEN-XXL

NOORDEN-XXL is a stimulant based on natural extracts of marine algae of the species *Ascophyllum Nodosum*. It is a product of a high stimulating power, as it provides a high proportion of natural plant hormones (cytokinins, auxins, gibberellins, etc.), amino acids and carbohydrates (alginic acid, mannitol, laminarin, etc.) which penetrate the cellular tissues focusing on the physiological processes of the plant, stimulating its growth and promoting flowering, fruit setting and fruit ripening.

AGRIVA HOLLAND B.V.

NOORDEN-XXL

General Application Dosages:

- Foliar: 150-300 cc/100 liters of water.
- Root: 2-4 L/Ha and applied until completion 10-15L/Ha and cycle of crop.

CROP	DOSAGE		NUMBER OF APPLICATIONS/ FREQUENCY
	Root	Foliar	
Fruit vegetables	2-4l/ha	150-200 cc/100l	2-4 applications
Leaf vegetables	2-4l/ha	200-250 cc/100l	2-4 applications
Citrus and	2-4l/ha	200-300 cc/100l	2-4 applications
Fruit trees, olive	2-4l/ha	150-300 cc/100l	2-4 applications
Extensive and		200-300 cc/100l	2-4 applications
